

Use of AI in CME per AAPA Policy HP-8436

For all conference materials created and presented, AAPA expects faculty to act in accordance with AAPA Policy: HP-8436 AAPA requires that AI be used responsibly in CME submissions, presentations, publications, and other scholarly endeavors. AI-assisted publications must comply with the International Committee of Medical Journal Editors (ICMJE) standards, ensuring proper attribution while maintaining human accountability for the work's accuracy, integrity, and originality. [Adopted 2025]
